Description

Games studies views games as complex objects, mapping the game 'object', the player 'subject' and the critical dialogue that delimits game space. This course explores games as cultural artifacts, arising from diverse cultural histories, landscapes and geographies, impacting and impacted by sub-cultures. Students will learn to analyse the mechanics, aesthetics and practices of games via varied analytical approaches addressing their textual, performative, socio-cultural, design and political contexts. As well, the course introduces students to tools and techniques to analyze the cultural impact of the videogame. Students with credit in VISM-2B15 may not take this course for credit.

Learning Outcomes

By the end of this course, students will be able to:

1. Study, discuss and play a wide range of videogames through the lens of several significant genres and subgenres of game studies scholarship including the status of videogames as art, the structure of game form, the human drive for play, and the videogame industry. Specific examples of videogame art and design practices along with the discussion of a wide variety of recent game studies texts will enable students to understand the different, often overlapping, contexts of videogames within contemporary culture.
2. Engage in an intensive writing schedule that develops the analytical approach necessary to understand the interdisciplinary nature of game studies.

Required Readings

You do not need to purchase a textbook for this course. All required readings will be freely available to download as PDFs and browser-based ebooks through the OCAD Library website. I will provide direct links to all readings on the Canvas course page. You will need your OCADU login information to access these readings.

Supplies

Every week, you must select at least one of the two assigned games to play before the start of class. These games will always be freely available to play and, in most cases, available to access on multiple platforms. However, if you do not have access to the game's required platform, there will also be links to relevant gameplay videos to watch as well.

Additionally, for this course's writing assignments, you should, whenever possible, aim to directly play the videogame(s) that you are choosing to discuss and analyze. Any computer, console, mobile, or web-based game is an equally valid topic for these assignments. However, I also realize that videogames can oftentimes be prohibitively expensive, so, if necessary, you can also use Let's Plays, Twitch streams, and video reviews and/or essays as necessary in your research process.

Student Preparation / Workload Expectations

You can anticipate that studying and completing class will require at a minimum 2–3 hours of time outside of class per week for every hour of in class time per week.

Teaching & Learning Methods

Every week, our classes will typically adhere to the following structure: I will begin class with a short introduction and go over any significant course housekeeping notes (reminders, updates, deadlines, etc.). Afterward, I will start a lecture section dedicated to reviewing and discussing that week's assigned readings and games. The lecture will also regularly contain external content, such as relevant video essays and quotes from non-assigned readings. Throughout the lecture, there will also be multiple discussion questions posed to the class that are meant as an opportunity to demonstrate your in-class engagement. The lecture will conclude with a brief summary of the following week's class content and reminders about any upcoming assignment deadlines.

Every week, you will be expected to read at least one of the assigned readings, play/watch at least one of the assigned games, write one of your game analysis journal entries, attend and remain engaged during lectures, and work on any upcoming/pending assignments that are due. All class resources will be made available through the Canvas course page. If you have any technical issues accessing any of the course content, please contact me as soon as possible.

Class Schedule

OCAD U has a twelve-class semester followed by a two-week assessment period for exams and critiques. Students must be available for the duration of this period.

Project Proposal	May 24 2024, 11:59pm	10.0%
Research Project	June 7 2024, 11:59pm	30.0%
Take-Home Exam	June 21 2024, 11:59pm	25.0%
		Total: 100.0%

Late Work

To ensure that the course TA and I can effectively provide you with a grade and feedback in a timely manner, all late work will be assessed with a penalty of -5% per day, and, without an approved extension, no late work will be accepted more than seven days after the initial due date. Additionally, please keep in mind that there will also be an inversely proportional relationship between how late you submit your assignment and the volume of feedback you receive alongside your grade (i.e., the later you hand in your work, the less comments you will receive). Please reach out as soon as possible if you think you will need an extension. I am typically very happy to approve extension requests as long as you have a good reason and they are sent well ahead of time.

Academic Engagement

Your Academic Engagement grade will primarily correspond to your in-class attendance and willingness to contribute to class discussion. Your attendance will be worth a total of 7.5 points, and you will earn 0.75 points every time that you attend class (you must stay until the end of class to receive the grade). This means that you can miss up to two classes with no lost marks. I will be using the automated Teams attendance reports to assess this aspect of your engagement grade.

The remaining 7.5 points of your Academic Engagement grade will be holistically assessed on how you demonstrate your week-to-week engagement with the course through any combination of the following activities.

- Making a post in the “Introduce Yourself” discussion forum on Canvas.
- Asking questions (either verbally or in the Teams chat) during class about the weekly assigned course material.
- Answering discussion questions (either verbally or in the Teams chat) posed during the lecture.
- Answering discussion questions via the Canvas discussion forums after the lecture slides have been uploaded.
- Participating within in-class breakout room discussion activities.
- Respond to another student’s discussion responses (either verbally, in the Teams chat, or via the Canvas discussion forums).
- Waiting behind after class to speak with me about the course.
- Scheduling time to speak with me about the course during my weekly office hours.
- Reaching out to me via email with questions related to course content.

*If, for whatever reason, you have a circumstance that makes engagement in this class difficult for you, please let me know as soon as possible, and we can discuss individualized alternative forms of assessment.

Style Guide

You are expected to submit your work for this course according to the conventions of the APA style.

For help with citation and format style, visit the [Purdue Online Writing Lab](https://owl.english.purdue.edu/owl/section/2/) 
(<https://owl.english.purdue.edu/owl/section/2/>).

Grading Breakdown

Numerical grades may be translated into letter grades based upon the following scale:

Exceptional

90–100% A+

Demonstrated an exceptional degree of creative and/or logical thinking, a superior ability to organize, to analyze, and to integrate ideas, thorough knowledge of concepts and/or techniques, and exceptional skill in their application in satisfying the requirements of the course.

Excellent

80–84% = A–

85–89% = A

Demonstrated a high degree of creative and/or logical thinking, a superior ability to organize, to analyze, and to integrate ideas, thorough knowledge of concepts and/or techniques, and a very high degree of skill in their application in satisfying the requirements of a course.

Good

70–73% = B–

74–76% = B

77–79% = B+

Demonstrated a good evidence of creative and/or logical thinking, a good ability to organize, to analyze, and to integrate ideas, knowledge of concepts and/or techniques, and considerable skill in their application in satisfying the requirements of a course.

Satisfactory

60–63% = C–

64–66% = C

67–69% = C+

Demonstrated a satisfactory level of creative and/or logical thinking, a generally adequate grasp of the subject matter, knowledge of concepts and/or techniques and competence in their application in

satisfying the requirements of a course.

Poor

50–53% = D–

54–56% = D

57–59% = D+

Demonstrated barely adequate knowledge and ability in creative and/or logical thinking and the application of concepts and/or techniques in satisfying the requirements of a course.

Unsatisfactory

0–49% = F

Failed to meet minimum acceptable command of knowledge and ability in creative and/or logical thinking and the application of concepts and/or techniques in satisfying the requirements of a course; or failure to complete a course; or by sanction as permitted by the university's academic misconduct policy.

Academic Integrity

Academic integrity is a shared responsibility held by all members of the OCAD University community. We uphold the integrity of knowledge-making and creativity: this means obtaining and sharing information responsibly, being respectful and transparent in the way that we use and respond to the work and contributions of others and explicitly acknowledging how such work and contributions inform our own. The University is committed to enforcing the policy and all allegations of academic misconduct will therefore be reported and investigated. The most common type of academic misconduct is plagiarism, that is, deliberately misrepresenting someone else's words, ideas or original visual concepts as your own in written or visual work. Other examples of academic misconduct include misuse of written or visual sources ("unintentional plagiarism"), cheating during an examination or test, collaborating on assignments without permission, and submitting any work for evaluation that has previously been submitted in another course without prior approval. Read the [Academic Misconduct policy](http://www.ocadu.ca/students/student-policies/academic-policies.htm) (<http://www.ocadu.ca/students/student-policies/academic-policies.htm>) to ensure you are well informed.

The Academic Misconduct policy is currently undergoing review to include specific guidance (rules/recommendations) around Generative AI (GAI) applications (e.g. Midjourney, ChatGPT). Currently, treat GAI applications like any other source: clearly indicate where and how you have used them and attribute/cite them. It may not always be appropriate to use GAI applications, so consult your assignment instructions for guidance on whether and how these applications may be used. When unclear or in doubt, reach out to your course instructor for clarification.

Student Feedback on Courses

OCAD University is committed to ensuring excellence in teaching and learning. As you approach the end of the course you will be asked to complete an online course evaluation during class time on your laptop or other web-enabled device. Your feedback is valued by faculty and is an important part of on-going efforts to enhance course design and teaching across the university. If you have immediate concerns about the teaching of your course, please bring them to your course instructor or Chair.

University Policies

As a student, you are responsible for being familiar with the academic policies, procedures and guidelines. University policies and procedures are subject to change and are not tied to a specific academic year, unless otherwise noted.

Please see the [Policies & Resources](#)

(https://canvascloud.ocadu.ca/courses/sis_course_id:19548/external_tools/80)_page.

Commitment to Sustainability

OCAD University is committed to developing decolonial approaches to sustainability that foster environmental justice through interdisciplinary solutions. To address the climate crisis, you are encouraged to approach your art, design, creative and critical practices with an understanding of the interconnections among environmental, social, economic and cultural activities. You may also consult the OCAD U [Sustainability Policy](#)

(https://www.ocadu.ca/sites/default/files/legacy_assets/documents/Sustainability%20Policy.pdf) which builds on the [United Nations Sustainable Development Goals \(UNSDGs\)](#) 

(<https://www.un.org/sustainabledevelopment/sustainable-development-goals/>) in support of ecologically-informed and holistic thinking that cultivates relationships between people, place, and land. Together we can advance global sustainability goals which include, among others: reduced inequalities; good health and well-being; affordable and clean energy; clean water and sanitation; climate action; and responsible consumption and production.

Production Materials Fees and Laptop Fees

In applicable courses, production materials fees cover the costs of materials consumed and/or incorporated in the making of student work in the shops and studios. Production materials fees are automatically added to your online fees account at the time of course registration, and are due in full by the first tuition payment deadline in August. Production materials fees are non-refundable after the last day to change courses with a 100% refund, as outlined in the Calendar.

Disclaimer Statement

This course outline may be amended as the course proceeds. The class will be notified and consulted about all changes. In keeping with the Grading Policy, once the course outline has been presented, no change in grade weighting may take place unless there is unanimous consent of all students present. Unless there are exceptional circumstances, notice must be given at a regularly scheduled class meeting previous to the class at which the issue is to be decided.
